Bootstrap : le système de layout et de grille

2 types de conteneur/d'agencements :

- fluide : pour chaque pixel d'aggrandissement de la fenêtre, les éléments s'adaptent.

- fixe : à certaines tailles de fenêtre (576px, 768px, 992px, 1200px et +), la taille du conteneur change

Un système de colonnes

- Une division de l'espace en 12 colonnes
- Une goutière de 30 px
  - 15 à droite de la colonne de gauche
  - 15 à gauche de la colonne de droite
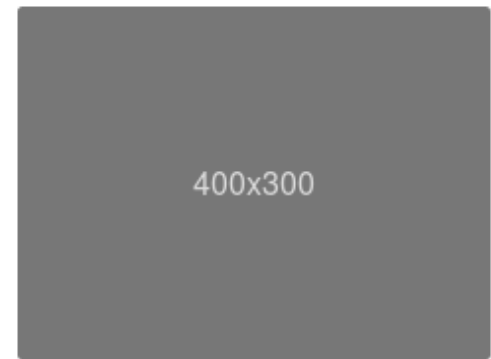

Quelques exemples d'éléments pratiques
